EXAMINER

NALVEN, ANDREW L

ART UNIT	PAPER NUMBER
----------	--------------

2134

DATE MAILED: 11/29/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/932,476

Applicant(s)

PEARSON ET AL.

Examiner

Andrew L. Nalven

Art Unit

2134

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 March 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-17 is/are pending in the application.
- 4a) Of the above claim(s) 11-17 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 8/17/01 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Claims 1-10 are pending. Claims 11-17 have been withdrawn.

Response to Arguments

2. Applicant's arguments filed 9 September 2005 have been fully considered but they are moot in view of the new grounds of rejection.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-2, 4-5, 8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Deo et al US Patent No. 5,721,781 in view of Le e al US Patent No. 5,794,054.
5. With regards to claims 1, 5 and 8, Deo teaches the interrogating of an electronic transaction terminal with an electronic security device to obtain an integrity metric for the electronic financial terminal (Deo, column 5 lines 45-50, column 8 lines 33-42), determining if the transaction terminal is a trusted terminal based upon the integrity metric (Deo, column 5 lines 45-50, column 8 lines 33-42, certificate), and allowing

Art Unit: 2134

financial transaction data to be input into the transaction terminal if the transaction terminal is identified as a trusted terminal (Deo, Figure 8 Item 132, column 10 lines 25-30). Deo fails to teach the measuring by a trusted device associated with the transaction terminal after the last restart of the transaction terminal. Le teaches the measuring by a trusted device associated with the transaction terminal after the last restart of the transaction terminal (Le, column 9 lines 1-48, microcontroller as trusted device that measures integrity of the bios following a reset). At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to utilize Le's method of measuring integrity with Deo's authentication system because it offers the advantage of it offers the advantage of providing reduced system cost, greater system reliability (Le, column 3 lines 40-45), and assurances that the bios is usable and non-corrupted (Le, column 1 lines 50-57).

6. With regards to claim 2, Deo as modified teaches the providing of user identification data for the user of the electronic security device to the transaction terminal via the security device to allow authorization of the transaction associated with the financial transaction data (Deo, column 9 lines 24-38).

7. With regards to claim 4, Deo modified teaches the compartmenting of different types of transactions into different compartments (Deo, column 4 line 63 – column 5 line 4).

8. With regards to claim 10, Deo modified teaches the device being a wireless trusted personnel device (Deo, column 4 lines 22-35).

9. Claims 3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Deo et al US Patent No. 5,721,781 and Lee et al US Patent No. 5,794,054, as applied to claims 1 and 5 above, in further view of Audebert US Patent No. 6,694,436. Audebert discloses a terminal and system for performing secure electronic transactions.

10. With regards to claims 3 and 6, Deo modified fails to teach the displaying of a user secret if the terminal is identified as a trusted terminal. Audebert teaches the displaying of a user secret if the terminal is identified as a trusted terminal (Audebert, column 25 line 65 – column 26 line 25, password displayed by terminal). At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to utilize Audebert's method of displaying secrets if a terminal is trusted with Deo's authentication system because it offers the advantage of providing assurance to the user that the terminal module is authentic and safe for use (Audebert, column 26 lines 19-25).

11. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Deo et al US Patent No. 5,721,781, Lee et al US Patent No. 5,794,054, and Audebert US Patent No. 6,694,436, as applied to claim 6 above, and in further view of Hind et al US Patent No. 6,772,331. Hind discloses a method for exclusively pairing wireless devices.

12. With regards to claim 7, Deo as modified fails to teach the deleting of the user secret after completing the transaction. Hind discloses the deleting of the user secret after completing the transaction (Hind, column 9 lines 57-61). At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to utilize

Hind's deletion method with Deo as modified because it offers the advantage of increasing security by reducing the likelihood that a secret may be compromised and used for impersonating a user (Hind, column 3 lines 17-32).

13. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Deo et al US Patent No. 5,721,781 and Le e al US Patent No. 5,794,054, as applied to claim 8 above, and in further view of Boerbert US Patent No. 5,272,754. Boerbert discloses a secure computing interface.

14. With regards to claim 9, Deo modified fails to teach a switch for initiating transfer of financial transaction data to the transaction terminal if the terminal is identified as trusted. Boerbert teaches teach a switch for initiating transfer of financial transaction data to the transaction terminal if the terminal is identified as trusted (Boerbert, column 10 line 63 – column 11 line 2). At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to utilize Boerbert's method of switching with Deo's authentication system because it offers the advantage of giving assurance that a user is operating the device and instructing transmission to take place instead of malicious software impersonating a user (Boerbert, column 2 lines 10-24).

Conclusion

15. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew L. Nalven whose telephone number is 571 272

Art Unit: 2134

3839. The examiner can normally be reached on Monday - Thursday 8-6, Alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Morse can be reached on 571 272 3838. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
